

COURAGEOUS INNOVATION

ACCELERATING DIGITAL TRANSFORMATION

Through Strategy, Design, and Intelligence

Fractional CIO/CTO/CDAO • AI Strategy • Agentic AI • Enterprise Architecture • Data • Swiftly®

WHO WE ARE

Orca Intelligence helps mission-driven organizations become **Intelligence Organizations** by aligning people, processes, data, AI, and emerging technologies. For years, we have built the governance, architecture, requirements, design, and workforce foundations needed to modernize with confidence.

OUR TRANSFORMATION ENGINE

Swiftly® applies Orca Intelligence's proven **Plan, Analyze, and Manage (P.A.M.) Accelerated Framework** to requirements discovery and solution design. Together, the platform and framework help teams establish clarity, strengthen traceability, support procurement, and move digital transformation from strategy toward implementation faster.

CORE SERVICES

Fractional CIO, CTO & CDAO Leadership

Experienced strategic leadership to assess priorities, align teams, govern investments, and guide modernization without adding a full-time executive hire.

AI-Powered Requirements & Procurement Support

Swiftly® structures requirements, design artifacts, traceability, and procurement outputs so teams can improve accuracy, collaboration, and speed.

Data Analysis & Architecture

Strengthen governance, integration, privacy, analytics, and reporting foundations for more confident decisions.

Enterprise Architecture & Emerging Technology Strategy

Connect mission and business goals to technical execution through practical roadmaps, compliance-aware design, and ethical, explainable adoption planning.

PROOF POINTS

\$1.3M
documented savings on a technology initiative

106%
of projects delivered within scope, budget, and schedule compared to national average

WHY ORCA

- **Proven framework + platform.** P.A.M. provides the method; Swiftly® accelerates requirements and design.
- **Strategy + execution.** We support assessment, planning, design, procurement, governance, and delivery oversight.
- **Prepared for the AI era.** Our work has long centered on the foundations required for responsible adoption.
- **Mission-driven focus.** Experience across government and organizations serving essential human needs.

COURAGEOUS INNOVATION

SERVICES + CORPORATE DATA

FROM REQUIREMENTS TO TRANSFORMATION™

Integrated leadership, architecture, data, AI, procurement, and design services

Vendor Management & Oversight

Reduce risk through stronger vendor selection, contract alignment, performance monitoring, delivery governance, and clear accountability across partners.

Agentic AI Creation & Management

Design secure, mission-aware AI-powered systems tailored to programs, governance models, and data environments so teams reduce manual work while remaining in control.

Intelligence Organization Assessments™

Evaluate AI readiness, technology maturity, workflows, governance, data capabilities, and modernization priorities, then translate findings into an actionable executive roadmap.

Executive Digital Presence™

Create approved-script digital executive content that scales thought leadership, leadership communication, education, training, and institutional knowledge.

CLIENT OUTCOMES

- **Faster transformation.** Accelerated requirements discovery and solution design create a clearer path to implementation.
- **Better decisions.** Stronger data, architecture, governance, and traceability improve confidence and accountability.
- **Lower delivery risk.** Stronger planning, procurement support, and vendor oversight reduce ambiguity and rework.
- **Sustainable adoption.** Responsible AI and emerging technology strategies align innovation with mission, people, and governance.
